

Satyam Yadav

Backend Software Engineer | Java | C | Spring Boot | Microservices | Apache Kafka | Oracle Tuxedo
Gurgaon, Haryana | +91-9783782262 | satyam.yadav.work02@gmail.com | linkedin.com/in/satyam-yadav-backend

PROFESSIONAL SUMMARY

Backend software engineer with **3 years** at **Amdocs** (telecom BSS) – promoted to Software Engineer in 2 years and selected for an on-site delivery assignment in **Mexico**. Delivers across two stacks: **Java/Spring Boot** REST APIs and **microservices** invoked from **Spring Batch** jobs, and **CRM/CSM** services written in **C** on **Oracle Tuxedo**. Owns delivery **end to end** – design through production rollout and **P1/P2** incident response.

TECHNICAL SKILLS

Languages: Java 21 / 8 | C | SQL | PL/SQL | Bash

Backend: Spring Boot | Spring Batch | Microservices | REST APIs | Event-Driven Architecture | Apache Kafka

Persistence & Caching: Oracle | PL/SQL (procedures, packages) | JdbcTemplate | JDBC | Redis | Spring Cache

Security: Spring Security | OAuth2 | JWT | MSAL (Azure Entra) | X.509 certificate auth

Deployment & Observability: Docker | Kubernetes | Jenkins (CI/CD) | Maven | Git | Linux | Splunk | Grafana

Testing & Core CS: JUnit 5 | Mockito | Multithreading & Concurrency | Design Patterns | System Design

AI-Assisted Development: MCP (Model Context Protocol) | AI agent workflows

PROFESSIONAL EXPERIENCE

Amdocs, Gurgaon

Aug 2023 – Present

Software Engineer

Jul 2025 – Present

- **Led design and rollout** of a near real-time audit platform that traces each customer transaction end to end through a unique **trace-ID**, consolidating every hop into a **single record** with latency, failure point and status.
- Cut **root-cause identification** from **1–2 hours to under 5 minutes** across **2–3M transactions/day**, enabling **per-application SLA measurement** and client reporting **~30%** faster through **Oracle SQL** and index tuning.
- Upgraded core services from **Java 8 to Java 21**, **Spring Batch 3.x to 5.x** and **Spring Boot 3**, including the **Jakarta EE** namespace migration (javax to jakarta) and dependency upgrades.
- Developed and debugged **CRM/CSM** backend services written in **C** on **Oracle Tuxedo**, covering service logic, defect fixes and production issue analysis.
- Built **MCP (Model Context Protocol) servers** on approved internal infrastructure, connecting logs, databases and internal APIs to **AI coding agents** – now used **team-wide**.
- Drove cross-team **P1/P2 incident** bridges, combining **Splunk** log analysis and **Spring Batch** debugging to restore service within SLA.
- **Mentored junior engineers** through **code reviews** and hands-on production debugging.

Associate Software Engineer

Aug 2023 – Jun 2025

- Built and scaled **Java/Spring Boot** microservices processing **5M telecom transactions/day** at **99.8% SLA**.
- Engineered **Spring Batch** pipelines with **partitioning**, multithreaded chunk processing and **retry/restart/skip**, handling **hundreds of thousands of records per run**.
- Published **500K+ events/day** through **Apache Kafka** producers powering the event-driven transaction flow.
- Delivered **20+ secured REST endpoints** with token-based auth, sustaining **p99 < 200 ms**.

KEY PROJECT

Azure Authentication Modernization for Spring Batch

Amdocs (On-site, Mexico)

- **Owned end-to-end delivery** of an enterprise authentication modernization for **Spring Batch** workloads, from technical design through production rollout.
- Integrated **MSAL (Azure Entra)** for **OAuth2** service-to-service access to enterprise APIs, replacing static credential-based authentication.
- Migrated to **X.509 certificate-based** authentication through reusable Azure modules with backward compatibility.
- Achieved a **zero-downtime** production cutover, validated by unit and integration tests.

EDUCATION

National Institute of Technology, Durgapur

2019 – 2023

B.Tech, Computer Science and Engineering | CGPA: 8.0/10

ACHIEVEMENTS

- Received an individual **Amdocs Excellence Award** for resolving critical production incidents.
- Recognized by the **client** for delivering the authentication modernization to production.
- Solved **500+ Data Structures & Algorithms** problems on LeetCode and CodeChef.
